Bài 2)

```
Interface ITramThuPhi {
    double tinhTienQuaTram();
}

abstract class xe implements ItramthuPhi {
    protect String bienso, mauxe, nhanhieu;
}

class xebuyt extends xe {
    double doDaiLoTrinh;
    @Override
    public double tinhTienQuaTram() {
        return (doDaiLoTrinh > 20) ? 10000 : 5000;
    }
}

class xetai extends xe {
    double ~~trongphi~~ trongtai;
    @Override
    public double tinhtienQuatram() {
        return (trongtai < 3) ? 15000 : 30000;
    }
}
```
